# MOHANADHARSAN N S

Data Analyst | Python | SQL | Power BI | Machine Learning | Data Storytelling
Dharsanparimala@gmail.com | +91-7904956663 | Trichy, Tamil Nadu, India | linkedin.com/in/mohana-dharsan | github.com/Mohanadharsan

## PROFESSIONAL SUMMARY

Results-driven Data Analyst with a strong quantitative background in Computer Science, Mathematics, Statistics and Econometrics. Proficient in **Python, SQL (Microsoft SQL Server), Power BI**, Machine Learning and Big Data tools for statistical modelling, **advanced analytics** and **automation** on **cloud-based data platforms (AWS, Azure)**. Skilled at **data storytelling and executive-level reporting**: turning complex business issues into root causes and practical, data-driven recommendations for senior stakeholders. Comfortable working autonomously in fluid, fast-changing environments, with strong ethics, data-governance awareness and clear written and verbal English. Industry exposure across Consumer Goods, Telecom and Retail, plus **exposure to ESG, sustainability and regulatory reporting data**.

## WORK EXPERIENCE

**Data Analytics and Machine Learning Intern - IBM** Jun 2024 - Nov 2024 | Trichy, India

- Performed end-to-end **data analysis** on large client datasets using Python (pandas, NumPy, scikit-learn) and advanced SQL, identifying root causes and recommending solutions that improved analytical accuracy by 38%.
- Developed and deployed supervised ML models (Logistic Regression, Random Forest, XGBoost) for predictive analytics across Consumer Goods and Telecom, achieving 87% accuracy.
- Designed **Microsoft Power BI** and Tableau dashboards (DAX, KPI visualisations) and **automated MIS reporting** via Power Automate, cutting manual effort by 40% and strengthening data governance and audit readiness.
- Delivered **executive-level reporting and data storytelling**: presented quantitative findings using SPSS and R to stakeholders, reducing client decision-latency by 30%.
- Built and maintained ETL pipelines on cloud-hosted client data and applied Big Data concepts (Hadoop/Spark) to high-volume extraction and transformation, working cross-functionally with consulting teams.
- Applied AI/ML-driven Business Process Improvement, reducing reporting cycle time by 45%.

## PROJECTS

**Predictive Customer Churn Analytics | Python | SQL | Power BI | Telecom** Machine Learning

- Engineered a supervised ML pipeline (Logistic Regression, Random Forest, XGBoost) to predict churn for a Telecom/Consumer Goods client: 91% AUC, 22% churn reduction, with quantitative reports and recommendations for senior stakeholders.
- Performed feature engineering, root-cause analysis (SPSS, R), ETL data cleansing and SQL extraction to identify key churn drivers; built Power BI dashboards visualising churn segments and KPIs.

**Retail Sales Forecasting and Demand Analytics | Python | R | SQL** Statistical Modelling

- Built time-series models (ARIMA, Prophet, LSTM) for a Retail client with 89% forecast accuracy, supporting inventory optimisation across 15+ product lines.
- Applied econometric techniques to disaggregate seasonal demand; used SQL and ETL workflows on AWS-hosted data stores and **automated reporting pipelines**, cutting forecasting cycle time by 35%. Delivered reports and visualisations to leadership teams.

## TECHNICAL SKILLS

| | |
|---|---|
| **Data Analysis & ML** | Python (pandas, NumPy, scikit-learn, TensorFlow) \| Classification, Regression, Clustering, XGBoost \| Predictive Modelling \| Feature Engineering \| Advanced Analytics |
| **Statistics** | SPSS \| R \| Econometrics \| Mathematical Modelling \| Quantitative Analysis \| Trend Analysis |
| **SQL & ETL** | Microsoft SQL Server \| SQL (Advanced Queries, CTEs, Window Functions) \| ETL \| Data Cleansing \| Data Validation \| Data Pipeline Automation |
| **BI & Reporting** | Microsoft Power BI (DAX, Power Query) \| Tableau \| Data Storytelling \| Executive Reporting \| MIS Reporting \| MS Excel \| PowerPoint |
| **Cloud & Big Data** | AWS \| Microsoft Azure \| Cloud-based Data Platforms \| Hadoop \| Apache Spark \| Automation (Power Automate) |
| **Domain** | ESG and Sustainability Data \| Regulatory Reporting Data \| Data Governance \| Audit Readiness |
| **Professional** | Root-Cause Analysis \| Business Process Improvement \| Stakeholder Management \| Ethics and Integrity \| Autonomous Working |

## EDUCATION

**B.Tech - Computer Science Engineering (AI and Data Science)** 2022 - 2026 | CGPA: 7.5
Dhanalakshmi Srinivasan University, Trichy, Tamil Nadu

## CERTIFICATIONS

Agentic AI Certified Foundations Associate - Oracle | The Rise of Multiagent Systems - IBM SkillsBuild | Get Started with AI in Azure - Microsoft Learn | Claude Platform 101 for Engineers

## LANGUAGES

Tamil (Native) | English (Fluent) | Telugu (Conversational)
